

Professional skills breakdown

FUTURE-FOCUSED TECHNICAL CONSULTANT

Carrer path analysis

AI & Machine Learning Integration

- Early-stage AI development with BT and Dr. Stephen Thaler's Imagination Engines (2003)
- AI dataset training for security applications and facial recognition systems
- Deployment of Project AI and open-source AI models on self-hosted infrastructure
- Integration of AI-driven analytics for performance optimization
- Pattern recognition expertise applied to predictive system development

Advanced Security Architecture

- Zero-trust network design and implementation
- Hardened security appliance deployment in mission-critical environments
- Penetration testing across layered defense systems
- Social engineering vulnerability assessment and mitigation
- Cybersecurity framework implementation aligned with enterprise risk management
- Deployment of physical-digital hybrid security solutions
- License plate recognition system implementation for restricted access environments

Next-Generation Infrastructure

- Layer 1, 2, and 3 network design optimized for low-latency applications
- High-bandwidth microwave point-to-point network implementation
- Solar-powered remote security and networking solutions
- Edge computing deployment for distributed processing environments
- Command center design integrating multiple data streams and security layers
- Self-healing network architecture with automated failover systems

Innovative System Administration

- Linux system hardening for enterprise environments (Kali, Ubuntu, CentOS)
- Windows Server administration and Active Directory implementation
- macOS fleet management and security optimization
- Containerized application deployment using Docker and Kubernetes
- Hypervisor configuration for efficient resource allocation
- Automated patch management and system health monitoring
- Cross-platform integration for heterogeneous computing environments
- Custom-designed open-source ad hoc single-board computers

Emerging Media Technologies

- HDR and 4K+ video processing pipelines
- Immersive audio production for spatial computing applications
- Deep archiving systems for long-term data preservation
- Content authentication and verification systems
- Automated transcoding solutions for multi-platform delivery
- High-speed secure file transfer systems for global content distribution

Software Development & Integration

- Python for automation, security testing, and data analysis
- JavaScript, HTML, CSS for web application development
- Java and C for systems programming and security applications
- Swift for iOS application development
- XML and JSON for data interchange and API integration
- CSound and Max MSP for audio processing applications
- Custom API integration across disparate platforms

Network & Infrastructure Expertise

- End-to-end network design from physical layer to application
- Wi-Fi heat mapping and optimization for complex environments
- VLAN implementation for network segmentation and security
- Firewall configuration and rule optimization
- VPN deployment for secure remote access
- Structured cabling installation with attention to future scaling
- Fiber optic termination and testing for high-bandwidth applications
- Wireless network security hardening
- DNS management and optimization

Hardware & Physical Systems

- Server rack design and implementation with efficient cooling
- Surveillance system installation (Axis, Bosch, AVA, Vigilant)
- Access control systems (biometric, NFC, RFID, traditional)
- Thermal and infrared imaging system deployment
- 3D printing design and production for custom solutions
- Equipment grounding and bonding for electrical safety
- Custom hardware development for specialized applications
- Solar power integration for remote systems

Data Management & Analysis

- Secure database design and implementation
- Data extraction and transformation from legacy systems
- Advanced Excel modeling and visualization
- Automated reporting system development
- Performance metric design and tracking
- Business intelligence implementation
- Pattern recognition across disparate data sources

Audio Engineering & Sound Design

- Immersive audio systems for next-generation media
- Spatial audio mixing and production
- Analog-digital hybrid recording techniques
- Circuit bending and hardware modification for unique sonic applications
- Custom DSP implementation for audio processing
- Audio restoration using advanced spectral techniques
- Studio design optimized for modern production workflows

Visual Media & Design

- WordPress and CMS development for digital presence
- Video production and editing
- Content creation optimized for emerging platforms
- Professional photography with technical precision
- 3D modeling and rendering (Maya, Blender)
- Digital painting and artistic creation
- User interface design with focus on intuitive interaction

Intellectual Property Creation

- Music composition and production
- Technical writing and documentation
- Content strategy development for digital platforms
- System design documentation with clear implementation roadmaps
- Aspiring author
- Aspiring painter

OPERATIONAL LEADERSHIP

Team Development & Management

- Cross-functional technical team leadership
- Remote team coordination and productivity optimization
- Technical training program development and implementation
- Standard operating procedure development for complex systems
- Performance evaluation systems based on objective metrics
- Crisis response coordination during system failures
- Scaling operations from startup to enterprise level

Project Implementation

- Mission-critical system deployment in high-security environments
- Enterprise-wide technology transitions and upgrades
- Interdepartmental coordination for complex implementations
- Resource allocation optimization for technical projects
- Vendor management and contract negotiation
- Deadline-driven project execution with quality assurance
- Risk assessment and mitigation planning

Business Process Optimization

- Workflow automation for increased efficiency
- Data-driven decision-making systems
- Process analysis and bottleneck identification
- Implementation of ticketing systems for issue tracking
- Client relationship management systems
- Technology integration for business transformation
- Technical due diligence for acquisition targets

ADAPTIVE ADVANTAGE

Cognitive Specialization

- Neurodivergent pattern recognition across complex systems
- Hyperfocus capability for rapid problem solving and implementation
- Multilateral thinking connecting disparate technical domains
- Rapid skill acquisition and implementation
- Systems thinking applied to technical and organizational challenges
- Intuitive understanding of technical interrelationships
- Anticipation of emergent properties in complex systems

Communication & Collaboration

- Fluent in English and Spanish; conversational Brazilian Portuguese
- Technical concept translation for non-technical stakeholders
- Documentation development for complex systems
- Knowledge transfer across organizational boundaries
- Remote collaboration tools optimization

- Cross-cultural technical team coordination
- Clear explanation of complex technical concepts

Continuous Adaptation

- Self-directed learning across multiple technical domains
- Early adoption and integration of emerging technologies
- Adaptation of legacy systems to modern requirements
- Cross-disciplinary knowledge application
- Regular certification in evolving technical standards
- Monitoring of emerging technology trends and applications
- Integration of theoretical concepts into practical applications

CERTIFICATIONS & FORMAL VALIDATIONS

- CompTIA Security+
- CIJS Criminal Information Justice System (Security and privacy. Privileged Role)
- Google Cybersecurity
- Product certifications: Axis, Salto, Motorola, Genetec, Avigilon
- Adobe Premiere certified
- OSHA Heavy Machinery certified
- Multiple martial arts black belts (Iaido, Wado-Ryu, Judo)

Comprehensive Expertise & Professional Experience:

Audio Engineering & Music Production

- Multi-track recording, mixing, and mastering for commercial releases
- Sound design for films, TV shows, commercials, and video games
- Foley recording, editing, and mixing for visual media
- ADR (automated dialogue replacement) recording and synchronization
- Voice-over recording, editing, and production
- Audio restoration and spectral repair for damaged recordings
- Circuit bending and hardware sound modification
- Surround sound engineering and spatial audio processing
- Analog tape recording, editing, and restoration (2-inch and ½-inch formats)
- Front of House (FOH) and monitor mixing for live performances
- Studio design, acoustics, and soundproofing implementation
- Session musician (guitar, bass, percussion) with recording credits including Iron Man (uncredited)
- Experience as Guinness World Record judge for BT's "Sonambulist" vocal edit count

Broadcast Media & Video Production

- Video quality control and technical assessment
- Frame rate conversion and synchronization
- HDR and 4K mastering and conversion
- Transcoding using professional tools like Ambergin
- Deep archiving of media to magnetic storage
- Content processing for HBO Latin America
- FTP data management for international media distribution
- Video editing and post-production
- Creating performance evaluation reports using CSV data extraction

Studio & Technical Management

- Chief engineer at multiple recording studios
- Equipment troubleshooting, repair, and maintenance
- Analog and digital signal flow optimization
- Vintage gear expertise and maintenance
- Timecode synchronization (SMPTE, MIDI, TimeCode, WordClock)
- Configuring and operating professional audio consoles (SSL, Neve, API)
- Patch bay design and implementation
- Training staff and interns on technical procedures
- Creating standard operating procedures and technical documentation
- Managing recording sessions and optimizing workflow

Music Performance & Composition

- Guitar (6, 7, 8 string) performance and recording
- Bass (4, 5, 6 string) performance and recording
- Piano, drums, ukulele, lap steel guitar, and flute
- Hand percussion specialist
- Vocal performance and recording
- Music composition for TV shows, films, and commercials
- MIDI programming and virtual instrument orchestration
- Music theory expertise (self-taught to Berklee standards)

IT & Network Administration

- Network infrastructure deployment and management
- Linux system administration (especially Kali Linux)
- Server deployment and configuration
- Implementing managed IT service platforms (Atera MSP)
- Creating ticketing systems and automated maintenance protocols
- Developing network monitoring scripts and heartbeat monitoring
- Deploying automated patch management systems
- Wi-Fi heat mapping for optimized network coverage
- Layer 1, 2, and 3 network design and implementation
- VLAN configuration and management
- Secure FTP server implementation
- Microwave point-to-point network setup for high-speed connections

Cybersecurity & Penetration Testing

- Vulnerability assessment and penetration testing
- Social engineering and physical security testing
- Wireshark packet analysis and network traffic monitoring
- Nmap network scanning and reconnaissance
- Metasploit framework for vulnerability exploitation
- Man-in-the-middle attack simulation and defense
- Security hardening for networks and endpoints
- Remote desktop security and VNC configuration
- Firewall implementation and management
- Wireless network security assessment
- Android device rooting and Linux conversion
- Expertise with HackRF, Flipper Zero, and Mini Marauders for covert security testing

Security Systems & Low Voltage

- Master Technician Level 3 in security and low voltage systems
- Surveillance camera installation for Axis, Bosch, AVA, Vigilant systems
- Access control system setup (crash bars, mag locks, motion sensors)
- Biometric reader installation and configuration
- License plate recognition system implementation
- NFC and RFID technology deployment
- Fiber optic cable termination and testing
- Structured cabling installation and network wiring
- Solar-powered security trailer design and implementation
- Thermal and infrared camera installation and configuration
- Command/control center design and implementation
- Integration of AI-based security solutions (Scylla, facial recognition)
- Deployment of hardened security appliances

Programming & Development

- Python for automation, data analysis, and security testing
- Java and JavaScript for application development
- HTML, CSS for web development
- C and Swift for application programming
- XML for data interchange
- JSON for API integration
- SSH implementation for secure connections
- Lotus Notes development
- CSound audio programming
- Max MSP for audio and multimedia programming
- AI dataset training for facial recognition systems

Manufacturing & Fabrication

- Metal cutting and modification (band saws, multi-tools)
- Aluminum fabrication and modification
- Riveting and metal fastening techniques
- 3D printing design and production
- 3D modeling using Maya and Blender
- Equipment grounding and bonding for electrical safety
- Basic electrical systems understanding (12V and 120V)
- Hardware and mechanical troubleshooting

Business & Leadership

- Data analysis and performance metrics development
- Workflow automation and process optimization
- Cross-functional team leadership and management
- Technology consulting for enterprise solutions
- Vendor management and contract negotiation
- Training program development for technical staff
- Content Processing Coordinator at HBO Latin America
- Security audit and compliance assessment
- Budget management and resource allocation
- Client relationship management

Languages & Communication

- Native in English and Spanish
- Conversational Brazilian Portuguese
- Technical writing and documentation
- Standard operating procedure development
- Performance evaluation reporting
- Presentation and public speaking

Software Proficiency

- Digital Audio Workstations: Pro Tools, Logic Pro, Ableton Live, Cakewalk, Cubase
- Video Editing: Adobe Premiere, Final Cut Pro, Avid
- 3D Modeling: Maya, Blender
- Programming Environments: VSC, Thonny, Max MSP, CSound
- Network Analysis: Wireshark, Nmap
- Security Testing: Metasploit, Kali Linux tools
- IT Management: Atera MSP
- Virtualization: Docker, Hypervisors
- Remote Administration: SSH, VNC, RDP
- Data Analysis: Excel (advanced), Google Analytics
- Marketing Tools: Facebook Ads, TikTok Ads, Bing Ads, Pixel Fire, Everflow
- Document Management: DocuSign, Formstack
- CRM: Salesforce, Zoho

Certifications

- CompTIA Security+
- Adobe Premiere
- CIJS Criminal Information Justice System (Privileged Role, Two Years)
- OSHA Heavy Machinery
- Google Cybersecurity
- Hyperwall and RTI programming
- Product certifications: Axis, Salto, Motorola, Genetec, Avigilon, AVA, Dolby, Pro Tools, Logic, Final Cut
- Concussion training for coaching

Professional Positions Held

- Chief Audio Engineer at multiple recording studios in Los Angeles
- Session musician and guitarist for bands and film projects
- Sound designer for commercials, films, and TV
- Recording engineer for Rod Stewart (Platinum record: Great American Collection of Dance Songs)
- Foley engineer and editor for film and television
- ADR engineer for Japanese anime dubbing
- Personal assistant to recording artist Sasha (pre-college in Mexico)
- Intern at McAfee Associates (Mexico)
- Intern at QUALI post-production center (Mexico)
- Audio restoration specialist at Farias Productions
- Pro Tools instructor
- Content Processing Coordinator at HBO Latin America
- Lead technician and later Master Technician (Level 3) at Broadcast Systems
- Director of a Call Center for mass tort legal processing
- Security systems installer and programmer
- Network infrastructure specialist
- Cybersecurity consultant

Creative & Artistic

- Digital content creation
- Twitch streaming and audience engagement
- Patreon management and content monetization
- Web development with WordPress
- 3D modeling and rendering
- Author
- Painter
- Composer
- Photography (studio and creative)

Athletic & Physical Skills

- Multiple black belts (Iaido, Wado-Ryu, Judo)
- Former captain of the Mexican National Pee Wee Hockey Team
- Rock climbing
- Water skiing and snow skiing
- Sailing
- Skateboarding
- Soccer and baseball coaching (with concussion training certification)
- Yoga practitioner

Intellectual Pursuits

- World History
- Art History
- Quantum physics with focus on entanglement and non-local field theory
- AI consciousness research and development
- Early involvement with machine learning (through BT and Dr. Stephen Thaler)
- Philosophy and history studies
- Music as consciousness technology exploration
- Pattern recognition and systems thinking

Movie Credits:

- Rampage: The Hillside Strangler Murders (2006) (Recorded/Mixed credit roll music) (adr mixer) (foley recordist)
- Stratosphere (2005) (TV) (foley mixer)
- Crimson Force (2005) (TV) (foley mixer) (adr mixer)
- Path of Destruction (2005) (TV) (foley mixer)
- Alien Blood (2005) (TV) (adr mixer) (foley mixer)
- Manticore (2005) (TV) (adr mixer)
- Frankenfish (2004) (adr mixer) (foley mixer)
- Dead Birds (2004) (adr mixer) (foley mixer)
- Monster (2004) (uncredited) (Assistant Engineer)
- I Love Your Work (2003) (adr recordist) (foley mixer)
- This Girl's Life (2003) (sound recordist)
- Henry and Marvin (2001) (assistant mix engineer)

Selected Discography

- Al McKibbin: Tumbao Para Los Congueros Di Mi Vida: (2004) (Assistant Engineer)
- Weird Al Yoncovik: Poodle Hat: (2004) (Assistant Engineer)
- Bangles: Re-mixes Vintage reels: (2003) (Assistant Engineer)

- Rod Stewart: As time goes by. The Great American Songbook Volume II. (2003) (Pro-Tools Engineer) **United States (RIAA) 3× Platinum**
- NU: Alpha Bravo ShockPop Disco (2003) (Assistant Engineer)
- Matchbox 20: Bright Lights, Video: (2004) (Pto Tools Editor)
- Matchbox 20: Record Rehearsal Sessions: (2004) (Assistant Engineer)
- Maven: Maven: (2004) (Assistant Engineer)
- Mariya Takeuchi: Songbook II (2003) (Pro-Tools Engineer)
- Yourself: Myself (2003) (Pro-Tools Engineer)
- BT: Emotional Technology (2003) (Assistant Recording Engineer for Dark Heart Dawning)
- "US Billboard 200 - 138th place, US Heatseekers Albums (Billboard) 3rd place, US Top Album Sales (Billboard) 138th place, US Top Dance/Electronic Albums (Billboard) 1st Place"
- Flood The Sky: Flood The Sky (2004) (Mixing Engineer)
- Life Of Agony: River Runs Again (2003) (Assistant Engineer)
- T.R.A.M : Lingua Franca: (2012) (Recording Engineer)

LIVE TV

- The John Oliver Show (Live content Processing)
- Chumel (Live content Processing)
- Vice (Live content Processing)
- FOX Deportes (Live broadcast audio engineer)

BROADCAST TV

Original Content Processing Coordinator

(HBO Latin America) Ensured shows premiered at the same time as the domestic markets but dubbed and subbed in Spanish and Portuguese across all of Central and South America.)

- In Treatment
- Ballers
- Big Little Lies
- Silicon Valley
- Eastbound & Down
- Treme
- The Righteous Gemstones
- Girls
- The Newsroom
- Boardwalk Empire
- True Detective
- Curb Your Enthusiasm
- Game of Thrones
- Veep
- The Leftovers
- The Sopranos
- The Wire
- Ray Donovan
- TOP CHEF (2006) (TV) (Additional Music Composer)
- IN DESIGN (2007) (TV) (Additional Music Composer)
